## ▪ Activities & Achievements

- **Improving Data Quality of Customer Relationship Management** ▪ 2017 - 2018  
American University of the Middle East ▪ Kuwait  
It's a dental clinic CRM system that can get more customers through social media.  
We used visual studio for coding, Microsoft management SQL server 2016 as a database  
and Microsoft Visio to design the flow charts and UML diagram.
- **enterprise application development** ▪ 2018  
American University of The Middle East ▪ Kuwait  
The project is about sales management system that's makes a distinction for small and  
medium size enterprises in observation and following stock and coordinating exchange  
process. It was implemented by using visual studio with C# coding language.
- **System Programming** ▪ 2017  
American University of The Middle East ▪ Kuwait  
About the project it is a hospital management system, that offers some functionalities  
such as registration, book appointment, view records, payment methods and etc....  
The way this project implemented was by Linux operating system using C programing  
language.
- **Database Programing** ▪ 2017
